AZALEAS

We specialize in Azaleas for growing-on. Get this stock in the early Spring, and it should grow into well developed plants for the following flowering season.

LINING-OUT STOCK . . .

Our Azalea liners are ready during March, April and May. These liners are grown in specially prepared beds of shredded peat and they are never allowed to slow down or become hardened. They have a good lot of very-much-alive healthy roots that hold a quantity of our fibrous peat: not only is this very helpful to them in shipment, but it gets them off to a quick start after you plant them. We call your special attention to our 3" to 5", 4" to 6", 6" to 8", and 8" to 10" sizes of growing-on stock listed on page 6.

Also see Page 11 for the new variety HOLIDAY.

DORMANT, BUDDED STOCK FOR FORCING . . .

For Fall and Winter delivery. Our budded Azaleas have a very heavy bud-count and are extra nice this year. They have been properly spaced for an even growth and have been sheared carefully to make nice full plants. All of these are grown in mixtures that run heavy to peat. This assures you that they will have a good root system, that they will carry well in shipment and that the transportation costs will not be excessive.

LINING-OUT STOCK...

LARGER STOCK For GROWING ON

FOR SPRING DELIVERY

For our patrons who require larger Azaleas for growing-on, we have a quantity of good, bushy, compact 3" to 5", 4" to 6", 6" to 8", and 8" to 10" sizes.

This is much heavier stock than the two standard liner grades. Frequent trimming and careful attention has kept it short and compact and it should make excellent pot-plants for the coming season. This stock can be supplied in the following varieties:

KURUME VARIETIES . . .

Hexe
Snow

Azalea Coral Bell

These plants are growing in our main lath shed. They have been well spaced and properly sheared. Please note how compact and uniform they are. This type of stock in 4-6", 6-8" and 8-10" sizes should make perfect pot plants for you for next season.

Transplanted Cuttings

These have just been brought from our propagating house and lined out 4 inches apart in beds of solid peat. They are grown on for several months (usually 8 to 10 months) to develop into the two grades of Liners that we offer for Spring delivery.

A SMALL SECTION OF OUR 5-ACRE LATH-HOUSE

This Lath-house is Devoted Entirely to Azaleas . . .

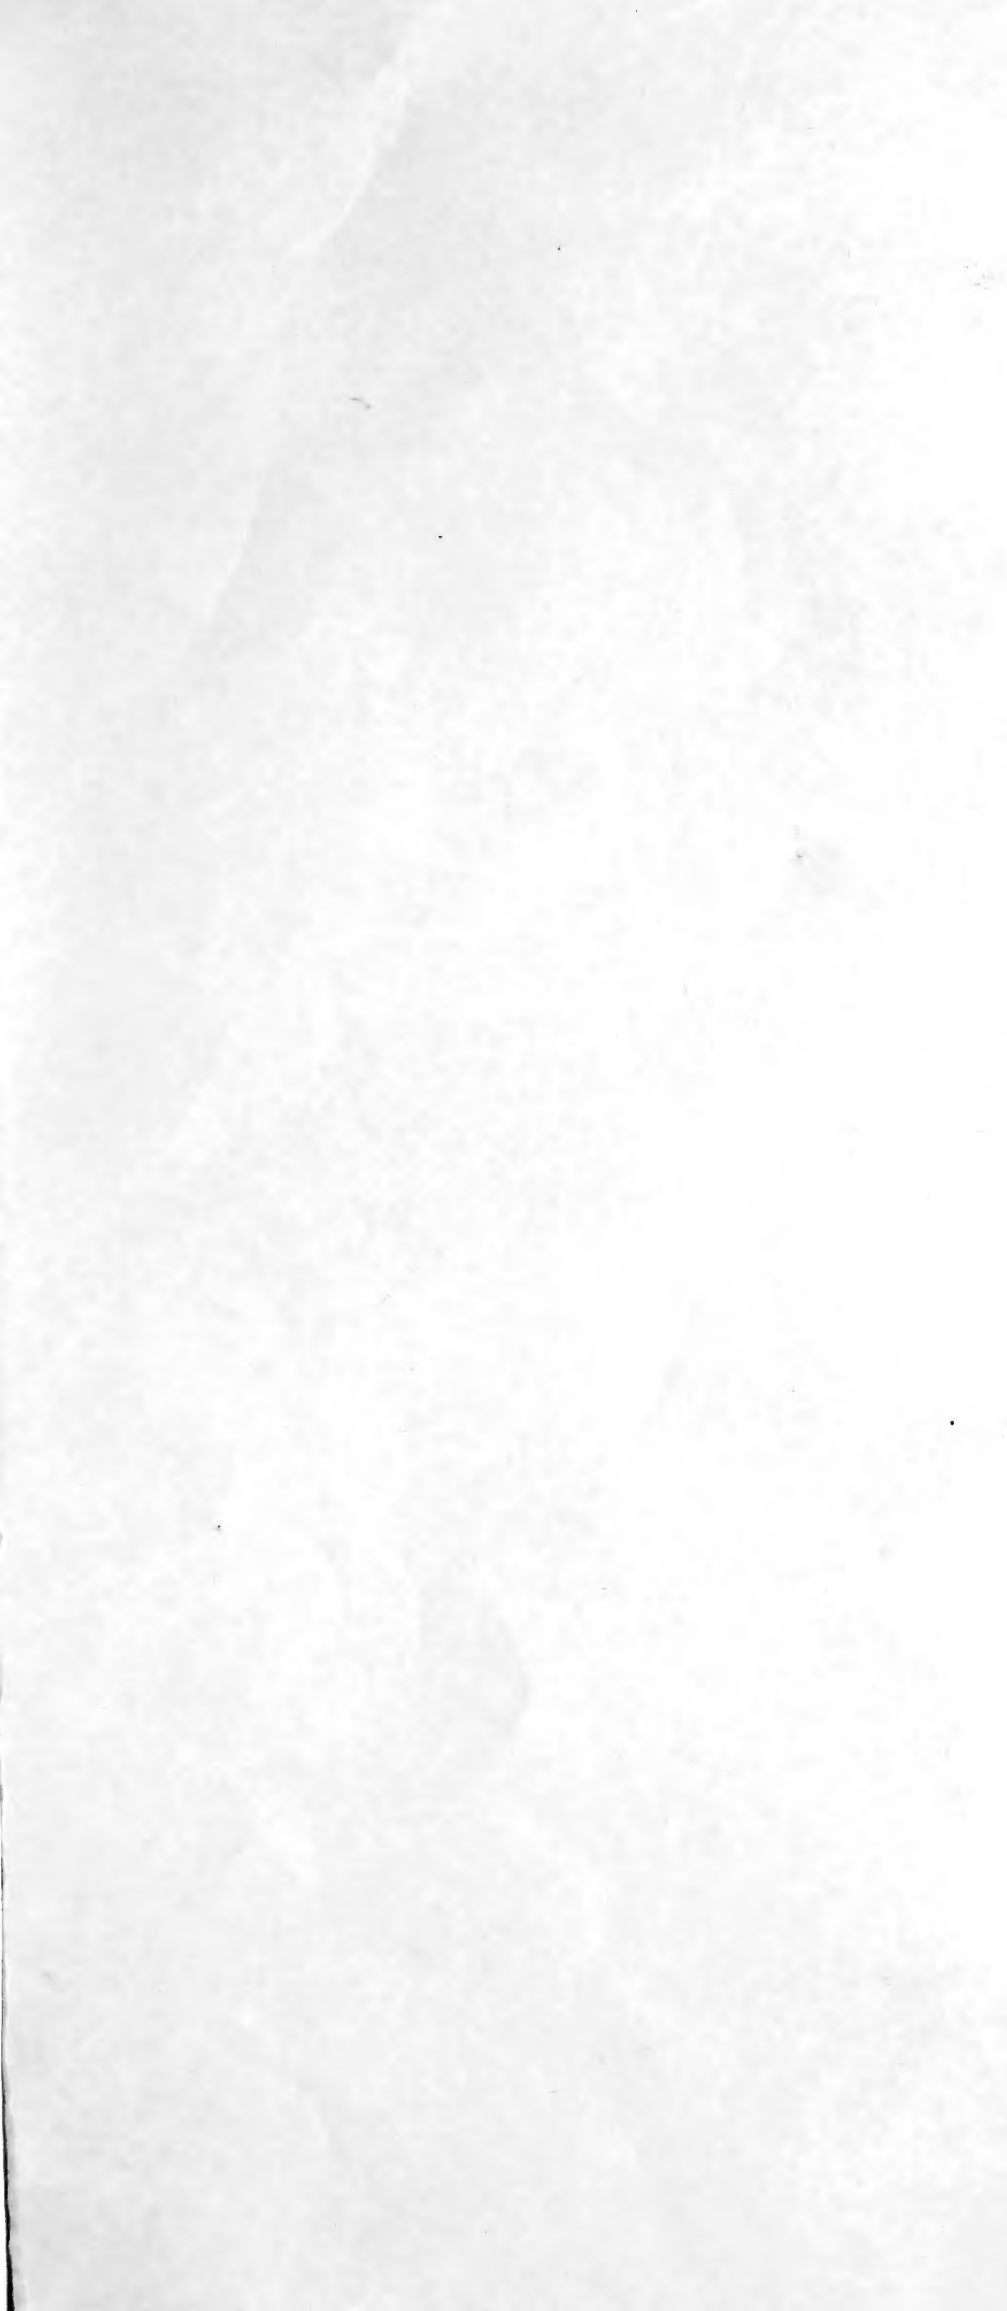

W. T. CHAMPNEYS & SON Inc.

"Quality Plants"

APOPKA, FLORIDA

These are grown . . .

in raised beds filled with acid peat that is dug by dragline from our own peat bog. This type of growing allows perfect drainage, which is so necessary to the growth and development of good Azaleas.

New 3-Acre Lath House

Built to accommodate 350,000 liners. Please note the muslin covers and the oil heaters which are assurance against possibility of cold damage.

Heavy Transplanted Liners

This stock was lined out quite early last year and is exceptionally strong and bushy. Your 8 to 10 lead liners will be selected from these plants.

AZALEAS

HOLIDAY

(one of the new ones in the Pericat family)

This variety has proven to be an exceptionally good grower and a prolific bloomer. Its salmon-pink flowers are borne in large clusters and it is the earliest flowering Pericat Hybrid we have ever offered. (Ideal for Christmas flowering.) It shapes up well for an excellent pot-plant and we heartily recommend it.

QUALITY LANDSCAPE MATERIAL

Short in variety — long in quality.

We have a small variety of choice landscape items that can be supplied in quantity this season. This stock has been grown at our peat farm, properly sheared and root pruned, and will come to you with a good ball and plenty of feeder roots.

Our customers who have handled this report very satisfactory results and we know you will be pleased with it.

We do not attempt to crate these plants — we offer them for sale at the nursery, or we will arrange for truck delivery if they are bought in quantity.
